SUMMARY

Entry-level Data Analyst with 1+ years of experience analyzing big data and visualizing data. Looking to apply my experience with BITool, System Design, and Python Programming.

WORK EXPERIENCE

Lab Assistant   **Oct 2024 – Jan 2025**
Quest Diagnostics   *Lenexa, KS*

- Collaboration with the team to keep up turnaround time due to high volume including overtime.

Lab Analyst-Data Analyst   **May 2022 – May 2023**
SGS (Société Générale de Surveillance)   *Callao, Peru*

- Implemented new Power BI models to summarize work hours, automate additional KPIs, statistically analyze results, and control documents.
- Developed an application to log work hours and increase accountability.
- Developed a Deep Process Model that created a statistical and visual analysis of imported results. My program increased client satisfaction and resulted in high contract renewal.
- Programmed a model to compile and summarize worker training from over 40 Excel spreadsheets, resulting in easier KAI Training tracking.

Lab Analyst   **Aug 2019 – May 2022**
SGS, (Société Générale de Surveillance)   *Callao, Peru*

- Devised algorithms in Excel to optimize procedures by converting manual workflow into a digital format.
- Collaborated with a team to develop algorithms and programs to automate data analysis.
- Conducted Granulometry Analysis using Macros. Programed relevant criteria to easily analyze and visualize data, which increased productivity over 200%.
- Introduced Power BI Desktop for KPIs in SGS to efficiently consolidate data.
